

## Fund update for the Life Cycle option Age 59 Year ended 31 March 2025.

This update was first made publicly available on 27 June 2025.

### What is the purpose of this update?

This document tells you how the Life Cycle option Age 59 has performed and what fees were charged. The document will help you to compare the fund with other funds. FireSuper Trustee Limited has prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

### Description of this fund

The Life Cycle option uses the Growth, Balanced and Conservative options as building blocks. Up until age 45, members are fully invested in the Growth option. From then, their risk/return profile is reduced gradually as they age by altering the allocations to these building blocks to the point of being fully invested in the Conservative option from age 64. At age 59, your savings are invested as follows: 42% Balanced and 58% Conservative.

Total value of the fund	\$1,066,224
Number of investors in the fund	2
The date the fund started	29 September 2021

### What are the risks of investing?

#### Risk indicator for the Life Cycle option Age 59

← Lower risk

Higher risk →

← Potentially lower returns   Potentially higher returns →

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at [www.sorted.org.nz/tools/investor-profiler](http://www.sorted.org.nz/tools/investor-profiler).

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the five year period to 31 March 2025. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (PDS) for more information about the risks associated with investing in the fund.

## How has the fund performed?<sup>1</sup>

	Average over past 5 years	Past year
<b>Annual return</b> (after deductions for charges and tax)	4.77%	4.76%
<b>Annual return</b> (after deductions for charges but before tax)	5.35%	6.22%
<b>Market index annual return</b> (reflects no deduction for charges and tax)	5.28%	6.57%

The market index annual return is based on the strategic asset allocation-weighted benchmark index return, where the benchmark indices are defined in the Statement of Investment Policy and Objectives.

Additional information about the market index is available on the offer register at:

[www.disclose-register.companiesoffice.govt.nz](http://www.disclose-register.companiesoffice.govt.nz).

This shows the return after fund charges and tax for each of the last 10 years ending 31 March. The last bar shows the average annual return for the last 10 years, up to 31 March 2025.

**Important:** This does not tell you how the fund will perform in the future.

## What fees are investors charged?

Investors in the Life Cycle option Age 59 are charged fund charges. In the year to 31 March 2025 these were:

	% of net asset value
<b>Total fund charges</b>	0.54%
Which are made up of:	
<b>Total management and administration charges</b>	0.54%
Including -	
Manager's basic fee	0.00%
Other management and administration charges	0.54%
<b>Total performance-based fees</b>	0.00%
<b>Other charges</b>	<b>Dollar amount per investor or description of how charge is calculated</b>
Administration fee	\$0.00 per annum

Investors may also be charged individual action fees for specific actions or decisions (for example, withdrawing from or switching funds). See the PDS for FireSuper on the offer register at [www.disclose-register.companiesoffice.govt.nz](http://www.disclose-register.companiesoffice.govt.nz) for more information about those fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

## Example of how this applies to an investor

Mary had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Mary received a return after fund charges were deducted of \$622 (that is 6.22% of her initial \$10,000). Mary also paid \$0 in other charges. This gives Mary a total return after tax of \$476 for the year.

### Actual investment mix

This shows the types of assets that the fund invests in

### Target investment mix

This shows the mix of assets that the fund generally intends to invest in.

## Top 10 investments

Asset name	% of fund net asset value	Type	Country	Credit rating (if applicable)
Russell Investments Global Fixed Interest Fund	34.22%	International fixed interest	NZ	N/A
BNZ Wholesale NZ Cash Fund	15.24%	Cash and cash equivalents	NZ	N/A
Harbour NZ Core Fixed Interest Fund	15.14%	New Zealand fixed interest	NZ	N/A
Mercer Hedged Overseas Shares Index Portfolio	12.30%	International equities	NZ	N/A
Mercer Overseas Shares Index Portfolio	10.00%	International equities	NZ	N/A
First Sentier Responsible Listed Infrastructure Fund	3.18%	Other <sup>3</sup>	NZ	N/A
Harbour Australasian Equity Fund	2.62%	Australasian equities	NZ	N/A
Salt Core NZ Shares Fund	2.62%	Australasian equities	NZ	N/A
Mercer Emerging Markets Portfolio	2.59%	International equities	NZ	N/A
Resolution Capital Global Property Securities PIE Fund	2.09%	Listed property	NZ	N/A

The total value of the top 10 individual assets is 100.00% of the net asset value of the fund.

## Currency hedging

The target foreign currency exposure is equal to approximately 50% of the international equities exposure. Foreign currency exposure is not actively managed at a strategic level. However, at an asset class and sub-asset class level, both market movements and, where applicable, active positions taken by the underlying fund managers can result in deviations away from the target level. The resultant foreign currency exposure would normally be expected to sit within a range of 40-60% of the international equities exposure.
